

To anyone who will listen there is a finally a place where people can go and listen to there favorite music and get news (WITHOUT) COMMERICALS and now you want to give them a hard time. Shame on you people remember a radio has 2 dials 1 turns it on & off and the other 1 changes the station if you don't want your children listening to a particular air personality you make sure that they don't listen but don't take away what I like to listen to and see because you don't have control of your kids.
